Restriction to one of the following inventions is required under 35 U.S.C. §121:

- I. Claims 1-9, 11, 12, 17, drawn to methods of making compounds.
- II. Claims 10, 13-16 drawn to synthetic intermediates

The claimed inventions are distinct.

Claims 11 and 10 are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP 806.05(f)). In the instant case, the product of claim 10 could be made by a solid phase procedure.

Claims 13-16 (on the one hand) and Group I (on the other hand) are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP 806.05(h)). In the instant case, the compounds of claims 13-16 are asserted to be useful in the process of Group I. However, these synthetic intermediates can be used to make other compounds. For example, the compound of claim 14 or 15 could be used to make the compound of example XXXI of USP 5,849,510.

Or the compound of claim 14 or 15 could be used to make the compound of SEQ ID: 122
(col 35, line 16) of USP 5,849,510.

Applicant is advised that for the response to this requirement to be complete, an election of the invention to be examined must be indicated, even if the requirement is traversed (37 C.F.R. 1.143).

Applicant is reminded that upon cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).

. . . .

In addition to the foregoing, applicants are required under 35 U.S.C. §121 to elect species
as set forth below:

- (a) a coupling agent used for coupling of compound III with compound IV, and for coupling of compound III with compound IVa.
- (b) a solvent used for coupling of compound III with compound IV, and for coupling of compound III with compound IVa.
- (c) a specific anion (designated by applicants as "X⁻").
- (d) a catalyst for hydrogenation of the olefin in the compound of formula II.

Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a generic claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP 809.02(a).

Should applicant traverse on the ground that the species are not patentable distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. §103 of the other invention.
